The Niagara of Denture Adhesives

OVER THE YEARS

With the good will of the dentist, an unceasing flow of CO-RE-GA has gone forth from our manufacturing plants to help millions of patients throughout the world gain confidence with immediate, partial and full dentures.

THE PERFECT ADHESIVE FOR DENTURES

DOCTOR!

Life-like Dentures — for patients of *every* race!

A patient's color and complexion need never be a bar to natural appearance in denture materials. Translucent and delicately mottled, *Lucitone* is as fair as the Fifteenth Amendment (racial freedom): it allows the natural coloration of any gum tissue to show through.

The result is a life-like appearance that could never be obtained with a denture material of a "flat pink" color.

For modern, undetectable dentures, specify *Lucitone* —the denture material made by Du Pont exclusively for dentistry, and distributed by Caulk.

ranges

Golds

*Reliable
Alternates*

WHEN ECONOMY
IS A STRONG
FACTOR

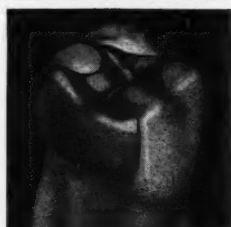

940* Soft -- Type A

A very soft, burnishable gold for occlusal and gingival inlays subject to slight or moderate stress.

Pure gold color. \$2.20 per dwt.

No. 2*

Color 22K dark
\$2.10 per dwt.

820* Medium Hard -- Type B

This is a definitely superior gold for M.O.D. and simple inlays, $\frac{3}{4}$ crowns, pontics and posterior abutments. It is hard; at the same time it is burnishable, a rare yet desirable combination of properties.

Light coin gold color. \$2.07 per dwt.

No. 5*

Light gold color
\$1.92 per dwt.

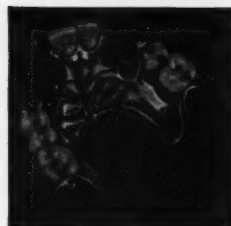

No. 13* Hard -- Type C

For M.O.D. inlays, full and $\frac{3}{4}$ crowns with thin sections, pontics, and inlay abutments, subject to hard stress.

Dark coin gold color. \$2.05 per dwt.

No. 8*

Light coin gold
color
\$2.00 per dwt.

No. 3† Extra Hard

Tough, strong, springy gold for all types of clasps, bars, partial dentures, $\frac{3}{4}$ crowns with thin walls, M.O.D. inlays, cast cusps, and fixed partial denture abutments.

Coin gold color. \$2.00 per dwt.

No. 19†

Light gold color
\$1.70 per dwt.

*These golds comply with A.D.A. Specification No. 5 for Inlay Golds.

†Extra hard—No specification has been set by the A.D.A. for this type of gold.

Published semi-monthly by the Chicago Dental Society. Publishing, Editorial and Advertising Office: 30 North Michigan Avenue, Chicago, State 7993. Annual Subscription \$2.50; single copies 15 cents; circulation 4,000 copies.

THE CALENDAR

December 15th: **Chicago Dental Society:** Regular monthly meeting to be held at 8:00 p.m. in the Red Lacquer Room of the Palmer House. Dr. Lee Atkinson of Salem, Ohio will speak on "Full Dentures."

- January 5th:** **Kenwood Hyde-Park Branch:** Regular monthly meeting, Tuesday, at the Del Prado Hotel. Dinner will be served promptly at 6:30 p.m. followed by a program conducted by The Dental Hygiene Institute of Chicago.
- January 5th:** **South Suburban Branch:** Regular Monthly Meeting, Tuesday, at the Elks Hall, Harvey. Program to be announced later.
- January 5th:** **West Suburban Branch:** Regular Monthly Meeting, Tuesday, at the Oak Park Club. Dinner at 7:00 p.m.
- January 8th:** **Northwest Branch:** Regular monthly meeting, Friday, at the Patria Restaurant, 2011 West North Avenue. Dinner at 6:30 p.m. Meeting at 8:30 p.m. "Dentures" will be the subject of the evening's discussion.
- January 12th:** **West Side Branch:** Regular monthly meeting, Tuesday, at Midwest Athletic Club. Dinner promptly at 7:00 p.m., meeting to follow at 8:00 p.m.
- January 12th:** **North Suburban Branch:** Regular monthly meeting will be held, Tuesday, at the Orrington Hotel in Evanston. Dinner will be served at 6:30 p.m., and the meeting will start promptly at 8:00 o'clock.
- January 12th:** **Englewood Branch:** Regular monthly meeting, Tuesday, at the Hayes Hotel. Edmund M. Glavin, Program Chairman, announces that "Dentistry—Faces Its Future," will be the topic for discussion.
- January 23rd:** **North Side Branch:** Dinner Dance to be held Saturday at the Edgewater Beach Hotel.

Full Dentures to Be Topic of Discussion at December Monthly Meeting

Dr. Lee W. Atkinson of Salem, Ohio, Essayist

That preeminently popular subject, Full Dentures, will be presented in new and inspiring fashion next Tuesday evening by Dr. Lee W. Atkinson, one of Ohio's outstanding clinicians. Dr. Atkinson will get down to cases and "dish out" the essential ingredients. The meeting will be staged, as usual, in the Red Lacquer Room of the Palmer House and the Society officers have promised that it will begin on time regardless of weather, war discussions or any other handicaps. Dr. Bernard D. Friedman, Acting Program Chairman and Master of Ceremonies, will again present the speaker in the absence of Dr. Quiter. Several table clinics by local society members will follow the lecture.

ESSAYIST

Dr. Atkinson appeared before the Greater New York Dental Meeting two weeks ago and last week repeated his paper before the Toronto Dental Society. Both of these organizations scrutinize their clinicians with meticulous care before inviting them to their platforms. He was one of the first limited attendance clinicians to appear at the Midwinter meeting and his popularity is attested by the overflow audience he attracted on that occasion.

GOOD DENTURES

There is every prospect that this will be an outstanding meeting. A denture must work well and look well, to be really good, according to Dr. Atkinson. It must be stable, safe for the tissues and comfortable for the patient in order to be satisfactory. To look well, the contours of the denture, as they affect the outlines of the face and the teeth themselves and as they show through the parted lips, must combine to give the patient a natural and pleasing appearance. The method of impression taking and setting up of the teeth must achieve certain objectives, if truly good results are to be secured. These methods Dr. Atkinson proposes to discuss. He has made some recent improvements in his impression technic that make for a more stable denture. He will illustrate his lecture with slides and models and will follow is up with a table clinic demonstrating the finer points.

TABLE CLINICS

A program of table clinics, under the direction of Dr. LaMar W. Harris, will be presented following Dr. Atkinson's lecture. *LeRoy E. Kurth* and *Peter B. Christensen*, Centric Relation and Pos-

(Continued on page 8)

Midwinter Meeting Program Now Complete

Outstanding Essayists and Clinicians

Scheduled to Appear

Subjects of popular interest will be given priority both as to the number of speakers and the time allotted to them at the 79th Annual Meeting of the Chicago Dental Society. Thus the Full Denture and Oral Surgery Sections will be given the choice assignments.

FULL DENTURES

Several new faces will be seen in this Section along with a number of the old reliables. *Dr. John C. Heisler* of Chicago will start the ball rolling on Tuesday morning with a discussion of The Theory of Establishing the Plane of Occlusion both in Dentulous and Edentulous Patients. He will be followed by *Dr. Louis S. Block* of Louisville, Kentucky, who will consider Tempero-Mandibular Problems especially in Relation to Vertical Dimension. *Dr. John B. La Due* of Chicago will round out the first morning session with a paper on Esthetics. Wednesday morning will find Northwestern's *Dr. Rudolph Schlosser* leading off with Full Denture Prosthesis of Unusual Cases, with emphasis upon the problems that will confront the dentist as a result of war injuries. And *Dr. Frank Vorhees* of Chicago will terminate the Wednesday morning program with a paper dealing with The Theory of Balanced Functional Occlusion. The Thursday session will get under way with a paper by *Dr. Emmett Beckley* of St. Joseph, Missouri. He will discuss Functional Occlusion in Artificial Denture Construction. *Dr. Cedric K. Dittmer*, Chicago Oral Surgeon, will give an illustrated lecture on Surgical Preparation of Mouths for Immediate Dentures and *Dr. Irwin H. Ante*, from the University of Toronto, will lend an international aspect to this section and discuss Impression Materials for Complete Dentures in Relation to the Varying Conditions Found in Different Mouths.

ORAL SURGERY

The Oral Surgery Section will confine itself, for the most part, to conditions which confront the dentist in general practice. The Tuesday morning session will find that perennial favorite, *Dr. Clarence O. Simpson*, of St. Louis, Missouri, giving a dissertation on The Roentgenogram (interspersed with satire and witticisms) as he evaluates them in diagnosing mouth conditions. Teamed with him are *Dr. Reed O. Dingman*, of the University of Michigan, in a return engagement, and *Earl A. Zaus*, M.D., of Chicago. *Dr. Dingman* will speak on the topic, Oral Surgery for the General Practitioner and *Dr. Zaus* will discuss Blood Dyscrasias and Their Oral Manifestations. *Dr. Allan G. Brodie*, of Chicago, will open the Wednesday morning session with a review of The Anatomy of the Head and Face (a Functional Consideration of the Osteology and Myology Involved in Jaw Fractures). He will be followed by *Dr. Wayne B. Slaughter*, of Chicago, presenting The Management of Jaw Fractures. The morning program will be brought to a close by *Dr. Eli Olech*, of Chicago, speaking on The Control of Infection in Jaw Fractures. On Thursday morning the first essayist will be *Dr. L. M. Fitzgerald* of Chicago who will take up the subject of Conditions Associated with the Removal of Third Molars. *Dr. Kenneth W. Penhale*, of Chicago, is the final essayist in the Oral Surgery Section and he will deal with Cysts of the Jaw, Their Diagnosis and Treatment.

OPERATIVE DENTISTRY

The Operative Dentistry Section has a well rounded program but the subject of Acrylics will somewhat predominate. *Dr. Walter C. Mc Bride* of Detroit,

Michigan and *Dr. A. Alfred Nelson* of Royal Oak, Michigan are the out of town men on this program. *Dr. Mc Bride* will give some pointers, *To You Who Operate on Children* and *Dr. Nelson* will take part in the *Acrylics Symposium*. *Dr. J. R. Blayney*, of Chicago, will give *A Report of the Progress Being Made in Solving the Problem of Dental Caries*; *Dr. Arne Romnes*, of Chicago, will present his paper, *Amalgam Restorations*; and the final session will bring together three well known Chicagoans, *Drs. Eugene M. Skinner, G. D. Wessinger and Stanley D. Tylman*, together with *Dr. Nelson*, in a round table discussion of *Acrylic Resins*. This group will bring to light all the known facts about these materials including their chemical and physical properties, their clinical properties in operative and crown and bridge prothesis and their clinical application in full dentures.

CROWN AND BRIDGE

Such well known figures as *Dr. Loren D. Sayre* of Chicago and *Dr. Lloyd Peyton* of Ann Arbor, Michigan, all enrolled in the Crown and Bridge Section. *Dr. Sayre* will describe the *Porcelain Jacket Crown* and *Dr. Peyton* will dwell on the *Physical Properties of Acrylics*. Besides these two men, *Dr. W. R. Mann* of St. Louis, Missouri, *Dr. A. F. Schopper* of Kansas City, Missouri, and *Dr. O. W. Silberhorn* of Chicago will participate in this program.

CHILDREN'S DENTISTRY AND ORTHODONTIA

Former Brigadier General Leigh C. Fairbank of Washington, D. C., who is now devoting his practice to Orthodontia, is one of the drawing cards in this Section. He will read a paper on the topic, *Treatment of Class 3 Malocclusion*. *Dr. Fairbank* will be followed by *Dr. F. Copeland Sheldon* of Kansas City, Missouri, whose subject is *Anchorage Dentistry for children* will come in for consideration by *Dr. Ralph L. Ireland*, of

Lincoln, Nebraska, *Introducing Dentistry to the Child*, and *Dr. Eugene J. North* of Buffalo, New York, *Protecting the Pulp in Deciduous and Young Permanent Teeth*. *Dr. John R. Thompson* of Chicago speaking on *Asymmetries of the Face* and *Dr. L. B. Higley* of Iowa City, Iowa, *The Proper Time to Begin Orthodontic Treatment*, will bring to a close this well arranged program.

PERIODONTIA

The Periodontia Section will stress the various methods of treating Periodontoclasia. No program of this nature is ever complete without that trio composed of *Drs. Balint Orban, G. R. Lundquist and Edward H. Hatton*. In addition to these three, there will be the famed histologist, *Dr. Bernhard Gottlieb* of Dallas, Texas, who will speak on the *Histological Consideration of the Supporting Structures*. Two men from North Dakota, *Dr. Lloyd B. Musburger* of Jamestown, North Dakota and *Dr. George Swendiman* of Grand Forks, North Dakota, will complete this array of talent.

RESEARCH

The Research Section has gone practical this year and there will be very little of the theoretical. Such subjects as the following will undoubtedly attract considerable interest: *The Healing of Tooth Sockets Following Extraction*, by *Dr. Warren R. Schram*; *Bone Healing Following Fractures*, by *Dr. Isaac Schour*; *Mouth Health in Industry*, by *Dr. Earle H. Thomas*; *Is the Teen Age Caries an Endocrine Problem?* by *Dr. Maury Massler*; all of Chicago. The out of town contingent consists of *Dr. Hamilton B. G. Robinson* of St. Louis, Missouri, *Dental Caries and the Metabolism of Calcium*; *Dr. Herman Becks* of the University of California, *Normal and Pathological Bone Formation of the Jaws*; and *Dr. F. D. Ostrander* of the University of Michigan, *Sulfonamides in Dentistry*.

To make the Essay Program even more

outstanding there will be a symposium on Practice Management, the details of which are not yet at hand.

PRACTICE MANAGEMENT

In the Practice Management Section a symposium will be presented on Tuesday and Thursday mornings on the following subjects: Recent Federal Legislation by *Mr. William F. Waugh* of Chicago; Socio-Economic Trends by *Mr. Peter T. Swanish* of Chicago; Special Problems of a Highly Industrialized Community by *Dr. W. M. Magnelia* of Rockford, Illinois; Credits and Collections by *Mr. Harvey T. Hill* of Chicago; and Personnel Problems by *Dr. W. N. Miller* of Flint, Michigan. On Wednesday morning one of the partners of Albert T. Bacon & Co., Certified Public Accountants, will present a paper on Income Tax Problems.

MISCELLANEOUS

Something new has been added to the General Clinics. Because of the great demand for Limited Attendance Clinics, a résumé of which will follow in a later issue of *The Fortnightly Review*, there is a dearth of clinicians who are willing to give table clinics. However the far-sighted policy of the officials of the Chicago Dental Society, has evolved an answer to this problem. The commercial exhibitors will be invited to participate in the General Clinics Program, with these provisos: 1st—The technic of treatment will be given under the supervision of a dentist. 2nd—They will be asked to demonstrate the physical properties and use of the materials only. 3rd—They may present table clinics dealing with practice management problems. The exhibitors have agreed not to indulge in sales talk during these demonstrations; they can, of course, try to convince the onlookers that they have a superior product . . . Small groups will be organized to "stump the experts." Question and Answer Periods will be conducted not only by local clinicians but by a number

of essayists, who have agreed to participate in this event. The Essayists will, of course, cover the subjects which relate to their papers . . . As previously announced, there will be no formal social functions during the coming Midwinter Meeting: no Frolics, no Dinner Dance and no Ladies' Luncheon. The general sessions will, however, be open to the ladies, as usual . . . In accordance with the recent vote of the membership, scientific bodies will be invited to meet during the Midwinter Meeting. This action was taken because of the cancellation of all American Dental Association conventions for the duration . . . Nearly 1,000 Associate Members already have joined the Society. Many of the applications have been accompanied by letters indicating that the applicant thinks that the Chicago Midwinter Meeting is "tops" in dental conventions. Representatives from forty-one states and the Dominion of Canada have sent in their dues, which makes the Midwinter Meeting truly national in scope.

FULL DENTURES TO BE DISCUSSED AT DECEMBER MONTHLY MEETING

(Continued from page 5)

terior Occlusal Plane in Full Denture Construction, patient demonstration; *John M. Besser*, Impression Technic; *Bernard O. Blomgren*, Impressions for Full Dentures; *Ralph E. Libberton* and *Sylvester W. Cotter*, The End Results of the Use of Acrylic Teeth in Full and Partial Dentures and Bridgework, patient demonstration; *Harry E. Denen*, Immediate Dentures; *Carl W. Gieler*, Some Practical Hints in Lower Impression Taking; *Edward A. Rubin*, A Technic of Establishing Centric Relation of Mandible to Maxilla Using Gothic Arch Tracing Extraorally as Demonstrated on Patient. Also Method of Obtaining Vertical Dimension and Occlusal Plane; and *R. M. Morange*, Stable Lower Dentures.

NEWS AND ANNOUNCEMENTS

MAJORITY OF CHICAGO DENTISTS OPPOSE HYGIENISTS LICENSING

A tabulation of the ballots of the members of the Chicago Dental Society who voted in the recent poll regarding the licensing of dental hygienists showed opposition to such licensure. 450 ballots were cast—88 for and 362 against. This poll was conducted to sample the sentiment of Chicago dentists for the information of the Legislative Committee of the Illinois State Dental Society. The Legislative Committee has since voted to disapprove legislation licensing hygienists at the present time, and so reported to the Executive Council of the Illinois State Dental Society at its meeting on December 6. The Council has decided to give the matter further consideration.

ARMY COMMISSIONS NOW AVAILABLE

The procurement objective for dental officers, Army of the United States, for the year 1943 has been announced by the Surgeon General's office. Appointments in the Dental Corps, Army of the United States, are now available to all qualified dentists under 37 years of age and to all of those up to 45 years of age who have been placed in Class 1-A by their local draft boards.

Applicants must be cleared through their state chairman, state Procurement and Assignment Service and the War Manpower Commission.

Upon request application blanks will be forwarded by the Dental Division, Office of the Surgeon General, to those who fall into either category referred to above.

PROPOSE DENTAL HEALTH WEEK FOR CHICAGO

A new project is being undertaken by the Institute—a Dental Health Week to be held in the spring, probably the week of April 5. Tentative plans have been

approved in principle by the Institute's Board of Directors and the Professional Policy and Guidance Committee, and will come before the Directors of the Chicago Dental Society for their endorsement on December 15. The Mayor will then be asked to proclaim this week as Dental Health Week.

The "week" is an old but very effective publicity device. Through it public attention can be focused on dentistry. Dental health is made spot news, and publicity in newspapers, on the air, and through other media is attainable which would not be possible under ordinary circumstances.—*Dental Hygiene Institute News Letter.*

MAYOR KELLY REPLIES TO OPEN LETTER

The following letter has been received from Mayor Kelly, in answer to the open letter to him published in the last issue of the Fortnightly Review:

OFFICE OF THE MAYOR
CITY OF CHICAGO

November 25, 1942

Miss Josephine Bessems
Educational Director
Dental Hygiene Institute of Chicago
30 North Michigan Avenue
Chicago, Illinois

Dear Miss Bessems:

Thank you for your letter of November 24, concerning the regrettable curtailment of Cooperative Dental Project No. 30336 and the possible effect of this curtailment upon the dental health of our school children.

I wish to assure you that I am heartily in sympathy with the program and that I am wholly mindful of what it has accomplished.

Every effort has been made to obtain sufficient funds through the Work Projects Administration for a continuation of this very worthwhile program; however, the W.P.A. administrators in the field,

who must necessarily be charged with the judgment as to the disposition of each project in relation to other projects in their states, do not see their way, in view of the very sharp reduction in the W.P.A. budget, to allow sufficient money for the continuance of Project No. 30336 upon its original full basis.

In the belief that he might have some constructive suggestions, I am happy to forward your communication to Mr. James B. McCahey, President of the Board of Education, under whose jurisdiction, as you are aware, the program lies.

With kind good wishes, I am

Sincerely yours,

(Signed) EDWARD J. KELLY
Mayor

FINAL REPORT ON CHICAGO COMMUNITY FUND

The Chicago Community Fund for 1942 has exceeded its goal of \$3,750,000, and the Chicago Dental Society Committee on Community Fund submits the following report.

Received from members of the Chicago Dental Society \$3,675, an increase of \$2,067 over the previous year. The total number of subscriptions is 793, an increase of 462 over the previous year. The largest single subscription was \$50. Thirteen subscribers gave \$25 or more. It should be noted that this is only the third year that the dental profession has had a separate quota and much credit should be given the previous committee in the 1940 and 1941 campaigns. Below is published a supplementary list of subscribers whose names did not appear in the first printed list sent out by the officers of the Community Fund.

EDITORIAL

CHRISTMAS CARDS MAY BE OMITTED

Many Chicago dentists will not send the usual number of Christmas greeting cards this year following the suggestion of the President of the American Dental Association, J. Ben Robinson. Doctor Robinson points out¹ that dentists can assist the war effort in two ways by abandoning this practice for the duration:—"First, the money usually spent by dentists for this purpose (estimated at a million dollars) could be applied to the purchase of stamps and bonds, which would mean a substantial contribution to the war effort; second, the withdrawal of a large volume of cards from the mails would relieve the postoffice facilities of a tremendous burden at a time when they are taxed to capacity."

A communication has been received from Postmaster Ernest J. Kruetgen of Chicago calling attention to the gigantic task confronting the Postal Service in handling the mails, both personal and official, for the members of our armed forces and for business enterprises engaged in the production of war materials. More than 1400 employees of the Chicago Postoffice are now in the armed services causing an acute shortage of experienced personnel. Postal train service has been curtailed.

There has been no order forbidding the mailing of Christmas greetings, only the request that the mails be used early and considerately. Undoubtedly, a large number of greetings will be sent, particularly to service men. Sending Christmas cards is a kindly, goodwill custom. However, if you do not receive cards from all the usual sources, remember that the reason is patriotism, not an oversight or loss of interest.

DENTISTS OVERSUBSCRIBE COMMUNITY FUND QUOTA

Chicago dentists have oversubscribed by 245 per cent the quota assigned them in the 1942 Community Fund Campaign. \$3,675.00 has been donated by 793 dentists. This response is commendable, particularly when it is remembered that dentists are called upon to contribute to the public welfare in many ways throughout the year, including health service for which they receive no monetary remuneration.

The dental profession led all other business and professional groups in meeting its prescribed quota. While we are proud of this fact, the achievement is not as great as it sounds. The reason is that the dental profession's quota was relatively small, principally because dentists have been contributing as a group with a goal of their own for only three years. The original quota was low in proportion to the number of dentists in Chicago. Each year has brought a steady increase in the amount of money donated. The chairmen of the dental committees for the past three years, Doctors Fred Gethro, Frederick Noyes, and Charles Freeman, are to be commended for the impetus they have given the drive.

We believe that actually many more dentists contributed to the fund than the tabulated records show. We know several who donated through other organizations—one gave \$25.00. It is true that funds, from whatever source contributed, go to the same good purpose, but if a comparison of group donations is made, credit should be given where credit belongs. If the source of the income from which the contribution is made is dentistry, then dentistry should receive the credit. Next year, we suggest that all dentists give through the dental committee.—Robert G. Kesel.

BOOK REVIEW

A Manual for the Differential Diagnosis of Oral Lesions: By Joseph L. Bernier, D.D.S., M.S., Major, Dental Corps, U. S. Army; Curator Dental Division Army Medical Museum, Secretary and Pathologist to the Registry of Dental and Oral Pathology of the American Dental Association; Chief of the Oral Pathology Section in the Department of Preventive Medicine and Clinical Pathology, Army Dental School, Army Medical Center, Washington, D. C. Cloth. 228 Pages, 175 illustrations, Price \$4.00, St. Louis. The C. V. Mosby Company, 1942.

Major Joseph L. Bernier, formerly of Chicago and now serving in the Dental Corps of the U. S. Army has just published a neat manual for the differential diagnosis of oral lesions. Dr. Bernier has had valuable experience as pathologist for both the Registry of the Dental and Oral Pathology of the American Dental Association and to the Army Medical Museum; his book represents a selection of the best cases from the Registry and the Army Museum.

The author discusses the indications and technic for the biopsy, pointing out the value of this procedure in establishing a diagnosis. The histology of the skin and mucous membrane is thoroughly presented. A chapter is devoted to the fundamentals of inflammation, and then oral lesions are discussed under the following classification: superficial lesions generally local in character, superficial lesions generally specific in character, benign tumors of the oral region, malignant tumors of the oral region, tumors of odontogenic origin, cysts of oral regions, and miscellaneous diseases of the oral region.

While this classification is helpful it resulted in occasional difficulties; for instance, the author included osteomyelitis under benign tumors specifically related to bone.

No attempt was made by the author to include all known tumors and diseases of the oral region, but he did place emphasis upon those lesions which seem to be most common. The objective of the author was to provide a handy reference book of the pathology and diagnosis of the common oral affections. The book could have been made more valuable to dentists in general practice if more clinical pictures had been included.

The illustrations used are excellent, especially the photomicrographs, and help explain the text. To the dentist and student doing any microscopic study of oral lesions, this manual of oral lesions will prove very valuable and even a casual reading by every dentist will be helpful.

"Manual of Standard Practice of Plastic and Maxillofacial Surgery." Prepared and Edited by the Subcommittee on Plastic and Maxillofacial Surgery of the Committee on Surgery of the Division of Medical Sciences of the National Research Council. Published by W. B. Saunders Co., Philadelphia, 1942. Price \$5.00. 432 pages, 259 Figures. Containing 899 Illustrations.

This book has been well, although very hurriedly prepared. The section on "Plastic and Maxillofacial Surgery" was written by Dr. Ferris Smith of Grand Rapids, Michigan, and it is a well written monograph. It is intended largely for military surgery and will be of lesser use in private practice. There are a few illustrations which are in part theoretical but the majority of them are representative of Dr. Smith's ingenuity.

The second section "Maxillary Surgery" was written by General L. C. Fairbank, Colonel R. A. Stout, Colonel Robert Ivy and Colonel A. B. Evy. This section approaches more the zone in which the dentist is located than the sec-

(Continued on page 23)

Applications for Membership

The following applications have been received by the Ethics Committee. Any member having information relative to any of the applicants, which would affect their membership, should communicate in writing with Dr. Edward J. Rus, Chairman, 3145 W. Cermak Road. Anonymous communications or telephone calls will receive no consideration.

ACTIVE MEMBERS

NEWS OF THE BRANCHES

WEST SIDE

Owing to the nation-wide gas rationing program, all future meetings of the West Side Dental Forum have been postponed until further notice. Because of this, our President, T. F. Porto, urges all members to attend the regular monthly meetings of the West Side Branch. Yes, do not be self-satisfied but come to our meetings and learn what new methods your fellow practitioners are using in their practices. Now is the time to mingle with others in this national crisis and help one another with knowledge gained from experience, so that no one can point you out as the "Old Time Dentist."

Ol' Time Dentist, that Ol' Time Dentist,

He must know something, but don't tell nothing,

He just keeps grinding, He just keeps grinding along.

He don't 'tend meetings, he don't send greetings,

And those who do not are soon forgotten;

But Ol' Time Dentist he just keeps grinding along.

You and me, we read and go,
Members of study clubs not so slow,
Illinois State! Meets next May
Loyal study clubs will be there to say:

He gets weary and sick of trying,
He's tired of living and 'fraid of dying,

But Ol' Time Dentist he just keeps grinding along.

So get out of your rut, don't spend all your life in the limited space called the "office," afraid that you might miss a fee on an extraction, but come on out to our meetings. Yes, I mean you. Will I see you at the next meeting at the Midwest Athletic Club? . . . Stephan W. Brundage was taken seriously ill on December 3. However, at the present time we are happy to report that he is on the road to

recovery . . . F. S. Kozlowski who for many years was located at 26th Street and Keeler Avenue has moved to 26th and Pulaski Road . . . Harry J. Cornwell has just returned from a vacation in Tampa, Florida, looking none the worse after his encounter with the Coast Guard Patrol . . . Warren Willman spoke before the University District Dental Society in Cedar Rapids on October 12 and in Rock Island on October 20. On both occasions he discussed "Amalgam and Its Manipulation." . . . I take this opportunity in the name of the officers of the West Side Branch and all the branch correspondents to extend to all our members greetings for a Merry Christmas and a Victorious New Year . . . Michael DeRose will write the next column. Please telephone news items to him at Nevada 8060.—*Casimir C. Dumanowski, Assistant Branch Correspondent.*

SOUTH SUBURBAN

The men who attended our December meeting were pleasantly surprised to hear and see Dr. Jarabak's lecture and slides on "Disturbances Caused by Glandular Conditions." The slides were very good and quite an education in themselves. It is surprising how attentive Taylor Bell can be when he wants to be. There was a slight drop in attendance, and we are trying to figure out whether it was due to the weather or gas rationing. Our president, Peter Iagmin and Lloyd Bettenhausen made a double trip back to the Heights to secure a projector necessary for the lecture, braving icy roads and gas rationing to do so—give the boys a hand. Dr. Tracy has revised his opinion about the war—he says it will be over in July, instead of August . . . All members of South Suburban will be sorry to hear that Dr. Montag of Blue Island is ill. Dr. Holt is sending him a Christmas card bearing the signatures of all the men who were present at our last meeting,

and in addition the branch is sending him a carton of his favorite cigarettes. —*Herman C. Gornstein, Branch Correspondent.*

KENWOOD-HYDE PARK

On Tuesday, January 5, the Dental Hygiene Institute of Chicago will present a very interesting program before the Kenwood meeting. Dr. H. R. H. Brevig, chairman of the Public and Professional Relations Committee of the Chicago Dental Society, will present some very interesting information on "The Background of the Institute"; John J. Hollister, secretary of the Institute, will speak on "Activities of the Institute"; and Miss Josephine Bessems, educational director, will discuss "Professional Publicity." A very excellent sound film, "The Keys to Health and Happiness," will be shown. A general discussion relative to the aims of the organization will follow the regular presentations . . . Lester Wilson has joined the Hoofers, Hikers, and Straphangers Club, now that an A ration book will not allow him enough gasoline to commute by car from Beverly Hills . . . Sig Carlson is very much disturbed about the apparent loss of his rationing book. Sig will be treading the slippery pavement until he consults the board regarding a new book . . . Smiling Les Butler is a fellow that can take a rap or two on the chin and still come up and go along in high gear. After the flu bug had made the rounds of the Butler household, and Les had returned to the office, a fire broke out and caused a little damage, but everything is back in order now and Les is smiling as much as usual . . . The heavenly twins—Boyd and Mast—recently returned from a hunting expedition in Dongola, Illinois, and reports indicate that they bagged plenty of quail. Their hunting efforts were assisted by Chief Three Feathers . . . Ernie Borgerding enjoyed Thanksgiving day golfing, even though it was quite chilly . . . Please note that a picture of our efficient president, Elmer Ebert, appears in the November issue of the Illinois Dental

Journal. He has been elected to the State Executive Council from the Chicago District. Congratulations Elmer! . . . Make a New Year's resolution that you will call our dinner chairman, Herb Parker, and reserve a place for dinner at the next Kenwood meeting on Tuesday, January 5, at the Del Prado Hotel. —*Howard E. Strange, Branch Correspondent.*

ENGLEWOOD

Your reporter is once again faced with the problem of supplying the news for Englewood . . . Last month my fellow correspondent was very fortunate in gathering his full quota of gossip . . . Wives were sick, one of the boys was married, new officers were elected, and the announcement of the Old Timers' Nite supplied the news . . . However, this month is conspicuous by the dearth of sensational developments. It seems almost as though peace has descended upon the earth a month before Christmas. To further complicate the news gathering facilities of yours truly, the dead line has been moved up three days. It, therefore, becomes the duty of the branch correspondent to fill the allotted space with news of some interesting fiction . . . All you men are familiar with the little sprites called Gremlins that are supposed to harass the fliers of the United Nations. These imaginary critters are responsible for a large portion of the bad luck of the fliers. They are credited with such noble deeds as punching holes in the gas tanks, clouding up the windshield, putting the bomb mechanism out of order, and other such miserable tasks. It recently has been called to my attention that there are relatives of these Gremlins that do their part in dentistry. These imaginary sprites are called Gripes. They spend a busy day in the dental office performing many of the following irksome tasks: They are the fellows who clog up your saliva ejector at the most inopportune moment; they derive great pleasure in chipping off amalgam when you remove the matrix; block injections

that fail to block are due to these little imps causing you to inject the solution too high or too low; in surgery they raise havoc with root tips, a simple extraction is complicated by a Dental Gripe when he anchors himself on your arm and causes you to apply the wrong forces; dry sockets are his specialty, being invisible he is able to place a maximum of "Dry Socket Bacteria" in the socket and thus cause one of those painful sockets; emergency calls from your patients because of bleeding sockets are due to the Dental Gripe leaving the office with the patient and mentally urging the patient to constantly rinse the mouth with warm saline and if this does not cause a hemorrhage he might even reach into the socket and pull the clot out . . . Operative dentistry is also a fertile field for his antics: In cavity preparation he gleefully pushes your bur and makes an undercut on the gingival and he further glories in chewing on the gingival margins of wax patterns. These are the most famous acts of Dental Gripes—Have you a Dental Gripe in your office?—*Jack I. Stillerman, Assistant Branch Correspondent.*

WEST SUBURBAN

On December 1 Al Dahlberg presented slides and discussed "Problems of Occlusion," before the Round Table. His talk dealt with the evolution of occlusion from teeth in early animals on up to present day man . . . On December 8 Mr. R. F. Bretzer spoke on "Different Phases in X-Ray Technique." . . . Major W. H. Tolar, who is home on a short furlough, graced the Round Table recently and gave an informal talk on "Dentistry in the Army." . . . Probably due to gas rationing, the president and vice-president were absent last week but program chairman Fred Hawkins did a nice job of pinch-hitting for them . . . We erroneously reported that the Paul Topels had a daughter. Excuse please, it was a son . . . Burglars invaded George Welk's home recently and among other things they took George's flash cameras . . . Vernon Hauff's son was operated on for

appendicitis and is reported doing fine . . . Apologies to Dewey Jackson and Ernie Hudec for having omitted their names in the report of the last branch meeting . . . Congratulations to Bill Schoen on his recent appointment as Editor of the Illinois Dental Journal. Hope you make that first dead line, Bill . . . J. J. Littig was a recent visitor at the Round Table. Come out more often . . . Yes, there are still Round Table meetings every Tuesday noon in spite of gas rationing . . . From Foster Robeson we learned of the death of a Northwest branch member who was a long time resident of Oak Park. To the family and friends of Dr. Oliver Ulvestad Sr., the West Suburban Branch extends sincere sympathy.—*Joseph M. Lestina, Branch Correspondent.*

NORTHWEST

"Dentures," that magic word, will be the headliner at the January meeting of the Northwest branch to be held on Friday, January 8. It is the wish of the program chairman that a large number be in attendance. The speaker has not been selected as yet, but Irv Neer promises us the best . . . Cornelius Lewandowski, sounds rather formal that way, spent Thanksgiving in Springfield. With the legislature also celebrating the holiday, Corny had no chance to speak to the various legislators re dental subjects—such as hygienists, V-signs and the like . . . From Tommy Severn comes a card telling us that he is being sent to the Naval Air Station at Tillamook, Oregon . . . George Ulvestad is still enjoying the memory of that trip to New Mexico to see his son get his Wings . . . R. M. Denton has been away from his office owing to illness . . . Northwest branch lost one of its original members when Oliver Ulvestad passed away on the last day of November. To his family the officers and members of the branch extend their deepest sympathy.—*Ben Davidson, Branch Correspondent.*

NORTH SUBURBAN

At exactly eleven o'clock on a recent Sunday morning, a small family entered the sanctum at Glenview's Naval Air Base to attend divine services. Under this guise, admittance was gained to view the Sabbath routine of that important military establishment. After church, the chaplain, who incidentally had been a former classmate of the family's father, acted as guide. The spiritual being having been satisfied, it was then essential that the physical being receive its sustenance. Dinner was served cafeteria style. Turkey and ham comprised the main course and the usual side dishes embellished by Sunday unusualities completed this fine military meal. The larder was nicely appointed and stacked to capacity with halves of beeves which were predominantly predominant, and other essential animal proteins. These choice steaks and roasts, on the semihoof so to speak, looked mighty good to the onlookers, who have had difficulty in procuring similar victuals for home consumption. With mouths watering, the entourage continued to the armory or fieldhouse. This structure and all adjacent constructions were so massive and pretentious that the hip pocket wallet began to shrink—and at the last report was still shrinking. The complete tour was a revelation—it revealed, to one American at least, where our tax money was going and how well, or otherwise, it was being utilized. In closing, Carl Brasmer agreed that a similar trip could be recommended highly for all red-blooded American citizens—like you and me . . . On Monday, November 30, the Chicago Association of Orthodontists broke bread at the Palmer House. The scientific program, which was conducted by Tod Dewel and bolstered generously by some of North Suburban's wire bending talent, was an inherent success. We will now talk about ourselves, not disparagingly, however, as was formerly the case in this column. Out of the north, our representative band headed straight for Chicago's Loop. Enroute, we witnessed the direct results of

the selfish monopolistic progenitors, who, through clever machinations, caused this unusual scene. Undismayed, but deeply irritated we proceeded to our destination. Reflect on the date for partial solution to the above. In our group was Jim Burrill, one of Orthodontia's deans, and incidentally president elect of the American Association of Orthodontists—a signal honor for a fine gentleman. Three excellent case reports were formally presented by Jim. John McGuire, Leonard Grimson, and Fred Barich were the other program participants who presented table clinics. Many and diverse were the orthodontic problems which were presented by the above group. So interesting was the program, that adjournment was postponed until an unusually late hour. Dick Smith, who, in part, was responsible for the program, and Jimmy Ford, who has contributed generously to the advancement of Orthodontics, rounded out our representation. Charlie Baker, who holds an attendance record for such meetings, was absent. This circumstance was so unusual that the boys wondered if something had happened to the dean of Evanston's arch formers. North Suburban may well be proud of the records of her formerly disparaged comrades-in-wires . . . 'Tis no longer a deep dark secret; Jim Carter was Jeff Schroeder's Interior Decorator—'fess up Jim! . . . Dr. Clifton Hill of Des Plaines is busily engaged as coordinator of his local Council in Civilian Defense . . . We are sorry to report the death of the father of Captain John Hannon of Des Plaines . . . The officers and members of North Suburban extend their deepest sympathy to Leland Johnson, whose wife, Elaine, passed on to her reward . . . By the time this copy reaches you, George Schnath and Grant Mac Lean will have joined the Order of Benedicts . . . This department extends Christmas Greetings to all of you.—*Frederick T. Barich, Branch Correspondent.*

NORTH SIDE

We suffered a great disappointment when the Honorable Charles S. Dewey

was unable to appear on our program. But owing to extremely urgent war legislation it was imperative that he remain in Washington. However, I am sure we understand and appreciate his great responsibility to the people of this nation and we realize that Representative Dewey's presence, in these critical times, is far more important in Washington than in Chicago at our meeting. His presence on the field of action will do much to save us and ours on other fields of action. So at this time let us give him a vote of thanks for a well meant endeavor; and to Mel Zinser for the tremendous amount of effort he put forth to bring this program to a successful culmination. All of us send him a thousand thanks . . . Dr. R. O. Schlosser, Professor of Prosthetics, Northwestern University Dental School, admirably filled in our program. Those who know him will agree that "Butch" is at his best when he is talking prosthesis . . . E. W. Luebke has beaten the meat rationing

with his trusty long bore. He informs me he matched wits with a denizen of the forest and returned home victorious, lugging a 185 lb. buck. Said buck being raised in Wisconsin I know just how tender it will be (Remember my address). Incidentally E. W. is the Chicago representative of the Illinois State Membership Committee and is doing an excellent job in that capacity . . . Your correspondent had the pleasure of bagging his limit of mallards along the Illinois river last week . . . R. G. Walser celebrated his birthday on December 1 . . . Fred Haberle was appointed historian of the Chicago Auxiliary of the Delta Sigma Delta fraternity . . . There is nothing so ignominious as to be surprised with a hurried dead line and no news. I hope I won't have to resort to Confucius again. Remember our next gala event is the Dinner Dance which will be the height of the social season. When? January 23. Where? Edgewater Beach Hotel.—*Orrin G. Baumgarth, Branch Correspondent.*

The Chicago Dental Society wishes to thank members of the Society for their fine support. The Committee received a number of complimentary letters from the officers of the Community Fund expressing great appreciation for the splendid contribution from our members. A number of favorable notices in the press were also received. The Dental Division led the entire field in the percentage of its quota 245 per cent.

Respectfully submitted. Fred W. Gethro, Chairman, Frederick B. Noyes, Harold W. Welch, William H. G. Logan, Charles W. Freeman, Willis J. Bray.

DENTAL DEALERS TO CLOSE SATURDAY OF XMAS AND NEW YEAR'S WEEKS

It is announced by the Chicago Dental Dealers that their members will not be open for business on the Saturday following Christmas and New Year's Day. In other words the Christmas and New Year Holiday will extend through the week end.

Contributors

Manuscripts should be typewritten, double spaced, and the original copy should be submitted. Every effort will be made to return unused manuscript, if request is made, but no responsibility can be accepted for failure to do so. Anonymous communications will receive no consideration whatever.

Manuscripts and news items of interest to the membership of the Society are solicited.

Forms close on the fifth and twentieth of each month. The early submission of material will insure more consideration for publication.

BOOK REVIEW

(Continued from page 12)

tion on Plastic Surgery. Here the authors have indicated personal methods. While personal methods represent honesty they do not necessarily completely envelop a subject or point out all of the useful methods. This section was written by men who have had military experience and therefore a distinct value is added to the section. Naturally enough most of the injuries in this section should

not be undertaken except by one who has had good surgical training and good surgical experience and preferably experience with the jaws.

While the volume is a good contribution to military surgery of the head and neck it will not be of any particular value to the dental profession. Any dentist in military service will do well to study the volume carefully. The book is well written and amply illustrated. The printing is excellent.

extends to each member of the profession their thanks for the splendid cooperation given the Dr. Butler Tooth Brush during the year, and their sincere good wishes for a Happy Holiday Season and Pleasant and Prosperous New Year.

Your Income Will Increase

New patients will buy dentistry and many old patients will buy more and better dentistry when allowed to pay through the medium of monthly payments.

Begin today telling your patients that all the dentistry you suggest can be completed starting immediately and that it can be paid for by convenient monthly payments. It is so simple to complete the details in the privacy of your office. Patients will be both receptive and pleased.

You receive check in full at once—less your discount.

Holiday Greetings

AND

A THOUGHT FOR THE NEW YEAR

We extend to the Members of the Dental Profession our wishes for a Happy Holiday Season and we sincerely thank you for the opportunity to have been of service to you.

In looking forward to the new year and the many wartime problems which we will all have to face, we ask your consideration of the manpower problem of people engaged in skilled service such as ours. Just as you are busier than ever and as a result are unable to design restorations for your patients as quickly as heretofore, so also do we find ourselves in a position of having to schedule work through our laboratory at somewhat longer intervals.

Our staff of technicians is made up of unusually capable people, but the demand upon their time and skill has been increased to such an extent that it is necessary for us to ask your cooperation in giving them a little more time to construct the restorations you send us with the highest standard of craftsmanship that we can both be proud of. We know that both you and your patients will understand the need of such cooperation.

Don't Let That Shadow Touch Them

Buy WAR BONDS

NOW—NOT LATER—is the time for everyone to do his share in the fight for our great American ideals. Now—to protect our loved ones and to lay firm foundations for the future. Planes, tanks, guns and ships don't build themselves—nor pay for themselves. The tools for victory cost money.

We at home can help those who are fighting for the freedom of our children by lending the Government our money. Undoubtedly, you already own War Bonds—or are buying them now. But the Government has figured that to get the money it needs—you, and everybody, should put at least 10% of your income into War Bonds.

We urge that you unhesitatingly join in preserving the freedom that we all hold dear. Don't wait—don't delay—be a 10 percenter today! Cook-Waite Laboratories, Inc. is proud to announce that a big proportion of its employees are 10 percenters.

**ORDER AUSTENAL MICROMOLD TEETH
FROM YOUR VITALLIUM LABORATORY**

ANATURAL lingual in artificial teeth is as hard to find as the proverbial "hen's teeth." Indeed, the only teeth which we know of that have a true natural lingual are Austenal Teeth by the Micromold Process. And the only reason Austenal Teeth have a natural lingual is because there is no need to use metal parts with Austenal Teeth, due to the new interproximal molded retention. This retention is probably the strongest known in dentistry, because it is based upon a scientific principle involving a number of undercuts which interlock firmly and permanently with the denture base material.
